Exergen drupa 2012

Dear Bob,

On May 3, 2012 the [Drupa](#) print media fair will begin in Dusseldorf, Germany and will end on May 16, 2012. This show is the largest in the graphics industry and runs every 4 years (it's like the Olympics, Leap Year, or US Presidential Election), that's how big and important this show is.

Exergen has a big role at this show as many of the OEM's who will be exhibiting their equipment are Exergen customers. HP Indigo, Heidelberg, Xerox, Xeikon, and Agfa are examples of some who will be there. I will accompany our partners from [Exergen Industrial OEM Sales Global](#) in the Netherlands, [Exergen's Official Competency Center for the Graphics Industry Worldwide](#). If you want to learn more about the industry or are in the industry and want to speak to the experts, they are the only ones in the world who can guide you in the right direction. [Click here](#) to send them an email .

Check out a few technotes below on the industry or go to our [Graphics page](#). I am looking forward to going to my first Drupa show after 15+ years in the business. I plan to learn a lot about how the industry has changed over the years and how we can make a bigger impact!

Sincerely,

Bob Harris
Exergen Industrial Sales Manager

Print/Ink Drying

For high speed printing processes, the limiting factor on productivity of the equipment is usually ink drying time.

[Learn More...](#)

How to Increase Printing Speed

A significant barrier to improvement in the quality of ink temperature control for most printing systems is the delay caused by the mass of the roller, especially when increasing speeds.
