Exergen Global Enables Syneron to Deliver Advanced Aesthetic Treatments

Syneron's Award Winning VelaShape III Selects the Exergen Micro IRt/c Sensor to Reduce Treatment Time and Improve Results

BY **MARKETWIRED** .

ARTICLE RATING:

MAY 30, 2014 09:00 AM EDT

WATERTOWN, MA and ZIJTAART, THE NETHERLANDS -- (Marketwired) -- 05/30/14 -- Exergen Global, the

worldwide value added supplier and solutions provider of Exergen's corporate line of infrared, non-contact, temperature sensors, today announced that [Syneron](#), a leading global aesthetic device company, has selected the world's smallest IR t/c sensor again, Exergen micro IRt/c, to empower its new aesthetic treatments.

Syneron manufactures a range of electronic devices and associated products for dermatologists, plastic and cosmetic surgeons or any professional who conducts nonsurgical cosmetic procedures including body contouring, skin rejuvenation, cellulite reduction, acne, hair removal, wrinkle reduction, etc. Syneron's VelaShape is the only FDA cleared device that effectively and safely contours, shapes and slims the body by reducing cellulite and firming problem areas.

In Q4 2013 Syneron announced the availability of the award-winning VelaShape III, which integrates Exergen's non-invasive IR temperature sensor into the

applicator. This sensor continuously measures the patient's skin temperature without interfering with the treatment. When the sensor detects that the skin temperature is reaching a critical limit, the specialist is informed by a pre-alarm and the treatment time or intensity can be adjusted accordingly to avoid patient discomfort.

"We understand today's hectic lifestyle and are dedicated to providing patients and professionals with non-surgical tools for full body treatments including circumferential and cellulite reduction options. In order to reduce treatment time while simultaneously improving results for our VelaShape platform we needed to increase the speed of the RF pulses and IR lamps, however we required technology that would not over heat a client's skin," said Shlomo Assa, president of Inlight Corporation, a division of Syneron Ltd. "Simply said, Exergen Global's Micro IRt/c sensor provided us with a proven non-contact IR temperature sensor that avoids overheating a patient's skin while providing a smooth treatment."

"In today's competitive environment, we recognize that organizations rely on science and technology to stay ahead. We designed our Micro IRt/c sensor to be the smallest IR sensor to fit into confined spaces, self-powered so it would not require a power supply and be maintenance free so it would not need to be recalibrated while it was in the field," said Dr. Pompei founder and CEO of Exergen Corp. "During the R&D phase we partnered closely with Syneron to ensure that our non-contact infrared sensor met the technical and size requirement needs of the VelaShape platform. We are extremely proud we were able to provide a customized but scalable solution that met their business needs."

About Syneron

Syneron Medical Ltd. is a leading global aesthetic device company with a comprehensive product portfolio and a global distribution footprint. The Company's technology enables physicians to provide advanced solutions for a broad range of medical-aesthetic applications including body contouring, hair removal, wrinkle reduction, improving the skin's appearance through the treatment of superficial benign vascular and pigmented lesions, and the treatment of acne, leg veins and cellulite. The Company sells its products under two distinct brands, Syneron and Candela.

Founded in 2000, the corporate, R&D, and manufacturing headquarters for Syneron Medical Ltd. are located in Israel. Syneron also has R&D and manufacturing operations in the U.S. The company markets, services and supports its products in 86 countries. It has offices in North America, France, Germany, Italy, Portugal, Spain, UK, Australia, China, Japan, and Hong Kong and distributors worldwide.

For additional information, please visit <http://www.syneron-candela.com>.

About Exergen Corporation and Exergen Global

Exergen Corp, the global leader in industrial and medical non-invasive temperature technology, provides non invasive temperature measurement devices providing lower cost, higher accuracy, less invasiveness, and greater reliability than ever previously possible. Exergen is well known for its award

Is Your Business 100% Ready for the New Era of Cloud Computing and Big Data? The Only Enterprise IT Event in 2013 Covering the Entire Scope of both Cloud & Big Data

Come to New York and get yourself up to date with the Big Data revolution! As advanced data storage, access and analytics technologies aimed at handling high-volume and/or fast moving data all move center stage, aided by the Cloud Computing boom, Cloud Expo is the single most effective event for you to learn how to use you own enterprise data – processed in the Cloud – most effectively to drive value for

- » [Schedule](#) your business.
- » [Exhibitors](#) There is little doubt that Big Data solutions will have an increasing role in the Enterprise IT mainstream over time. Get a jump on that rapidly evolving trend at Big Data Expo, which we are introducing in November at Cloud Expo New York.
- » [Sponsorship Info](#)
- » [Conference Info](#)
- » [Hotel Info](#) "Cloud" has become synonymous with "computing" and "software" in two short years. Cloud Expo is the new PC Expo, Comdex, and InternetWorld of our decade. By 2012, more than 50,000 delegates per year will participate in Cloud Expo worldwide.
- » [Press Registration](#)
- » [Call For Papers](#) The cloud is certainly a compelling alternative to running all applications within a traditional corporate data center. But moving from theory into practice is where things get complicated, and this is where attending a top industry event like Cloud Expo comes in.
- » [Media Sponsors](#)
- » [Advisory Board](#)
- » [Volunteers](#) No one can take full advantage of cloud computing without first becoming familiar with the latest issues and trends, which is why the organizing principle of the 10th International Cloud Expo on June 10-12, 2014 - is to ensure - through an intensive three-day schedule of keynotes, general and breakout sessions, and our bustling Expo Floor - that attending delegates leave the Javits Center with abundant resources, ideas and examples they can apply immediately to leveraging the Cloud, helping them to maximize performance, minimize cost and improve the scalability of their Enterprise IT endeavors.

Delegates will leave Cloud Expo with dramatically increased understanding the entire scope of the entire cloud computing spectrum from storage to security.

Whether you're an enterprise or small to medium business, you'll soon be benefiting from the Cloud. Join your peers in New York June 10-12, and maximize those benefits already in 2014. See you in New York!
