WATERTOWN, Mass., Apr 25, 2017 (GLOBE NEWSWIRE via COMTEX) --

Exergen Corporation announces the availability of new professional Temporal Artery Thermometer TAT-5000S models connected to leading vital signs monitors. The new TemporalScanner models are available in six different variations to meet a variety of major vital signs monitor requirements, all supporting the use and advancement of Electronic Medical Records (EMR).

The connection of the TemporalScanner, an award-winning, breakthrough medical thermometer supported by more than 70 peer-reviewed published studies for accurate, completely non-invasive temperature assessment, now eliminates the need for manual entry of data, when connected to vital signs monitors. This significantly aids in the organization, security and confidentiality of patient records. In addition, the connected Exergen TAT models provide convenience and speed for the clinician.

"Through the addition of these new models, we are able to meet the demands of hospitals and clinics for fast, accurate, non-invasive thermometers connected to vital signs monitors, which all automatically record patient data, saving time, improving record accuracy and security, and reducing costs," said Francesco Pompei, Ph.D., CEO of Exergen Corporation. "Our focus on patient comfort and security speaks to our commitment of introducing new connected models of TATs for vital signs monitors," added Dr. Pompei.

Exergen Corporation is dedicated to improving and increasing quality, efficiency and accuracy of temperature taking in patient records. With more than 70 published studies supporting its accuracy, the TemporalScanner helps improve patient outcomes while improving patient and clinician experience. The connected models are now available with eight leading vital signs monitors (see <http://www.exergen.com/tat5000s>).

ABOUT EXERGEN CORPORATION

Exergen manufactures and markets two series of the TemporalScanner thermometer: a professional version for hospitals and clinics, and a consumer version sold in major retailers nationwide. More than two billion temperatures are taken each year with TemporalScanners. Used in thousands of hospitals and clinics across the country as well as in millions of homes, TemporalScanners are the #1 preference of pediatricians, #1 preference of nurses, and #1 selling retail thermometer. The Exergen TemporalScanner's accuracy is supported by more than 70 peer-reviewed published studies covering all ages from preterm infants to geriatrics and all care areas from hospitals to homes.
